The Artist Power Index ranks the worldwide popularity of musical artists based on streaming audience, airplay audience and social network activity over the previous 7 days, along with ticket sales and market activity for live concerts over the past 30 days. Individual rankings are weighted to determine Index rank, with Live as the heaviest weighted ranking followed by Streaming, Airplay and Social in that order. "DNP" = Did Not Play - artist had no shows in Pollstar's database over the last 30 days or no recent Boxoffice reports. Rankings in RED signify positive index trajectory.
